

## How we Support Projects in the Cascades Classes

- Every team member in a church plant should have a Mentor/Coach Connection.
- We will encourage and often supply Coaching for Planters through our license with Ministry Advantage.
- We make sure that there is a connection to a Classis Church—support will focus on prayer and relationships, but also include tactical and financial issues.
- Every project will have a SUPPORT TEAM from a classis church. This Support Team will:
  1. Pray for the project
  2. Hold the project accountable to outreach oriented benchmarks
  3. Cast the vision for the project through the supporting church, and reflect the vision back to the planting team
  4. Serve as a buffer between the classis and the project leaders. Planters only have one committee that they report to – the Support Team. The support team will then work with the Classis Multiplication Team (CMT) and the CMT will work with the greater classis leadership.
